

XVIEW CLIENT REFERENCE GUIDE

Simple - Reliable - Scalable

Seneca provides client workstation solutions for single and multi-site surveillance systems. Whether viewing from a single monitor with multiple cameras or multiple monitors, Seneca can provide a solution to fit your demand. The Seneca solutions are purpose built for the surveillance market and optimized with leading VMS applications.

Standard – Cost effective client viewing

Pro and Pro Plus – Mid-range client viewing

Corporate – Exceptional performance for multiple monitor viewing

Enterprise – Ideal for large scale deployments
