

Commend Programming Service

Security and Communication

The Commend product does not stop at the hardware / software level. We provide the total solution. Commend Inc. now offers Commend Programming Services (CPS), a comprehensive range of intercom programming services, designed with your customers' needs in mind.

Fully configured intercom system to satisfy your end user's exact requirements

Meet critical deadlines with ease

Reduce technicians' onsite time

Increase efficiency and profitability

#CPS1

#CPS2

#CPS3

#CPS4

Our cost effective tiered pricing system makes estimating your programming charges simple.

The CPS Process

- We start by gaining a clear understanding of the tasks that your customers will perform
- Our technicians understand the technology and will ensure that the solution totally meshes with your end users' requirements
- The Customized system CCT File will be delivered fully preconfigured per exact customer specifications
- CPS will work around your project schedule to help meet tight implementation deadlines
- CPS and Commend Technical Support are available throughout and following system installation

Overview of Technical Advantages:

Commend Inc. works in close co-operation with its dealers to serve them with leading intercom solutions that are custom tailored to their individual requirements and specific environments. We create user friendly solutions to complex problems.

Commend has a professional / experienced technical department with many years of experience providing intercom system solutions. Your company will benefit from this convenient service. Please contact your Commend Regional Sales Manager or local representative to learn more and start the CPS process.
