Security and Communication

Commend for Building and Communication Solutions

Meeting communication needs of users and visitors

In modern office buildings, meeting the needs and wants of an ever-changing community of users is essential. This includes flexible routing of any available communication line to one or more control stations. These routing patterns must allow for quick, easy modification on an almost daily basis. A control station may also be any type of mobile device, such as a smart phone. Tailored Commend solutions deliver reliable communication that preserves ultimate intelligibility even under the most difficult of conditions and changing requirements.

The Challenge

Are you able to react flexibly to your tenants' needs by simply adding new functions to your system?

How will visitors find their way around the building to get to a particular person quickly and easily?

Can you provide smooth, easy-to-use communication at entrance and exit gates?

Would you be able to talk to persons who are trapped in a lift car over a clear, intelligible audio connection?

Can all of these scenarios be handled and coordinated through the same system?

The Solution

The modular Commend system lets you add Intercom stations with great flexibility and ease, allowing you to assign them individually to your control stations.

Touch screen terminals in the reception area provide intuitive interaction to let visitors talk to the person they are looking for and show them where to find them.

eHD Audio quality ensures that even at high background noise levels speech sound comes through with perfect crystal clarity.

Compact Lift Intercom stations offer superior speech quality and perform regular functional self-tests to ensure reliable availability around the clock.

Thanks to their multi-functional capabilities, Commend Intercom systems enable you to handle all communication processes on the same uniform platform. Individual customisations can easily be configured or implemented on demand.

Commend – Your individual communication solution

Communication lines for lifts, access areas, ticket vending machines, main reception desks, information and help points, office work areas and any other building sections all converge on a single system. This way, complex communication and control procedures are simplified and can be performed centrally or locally, as needed.

Public Address (ELA)

Option for multi-site or storey-specific announcements and information broadcasts.

Door communication

Secured access video-based Intercom entrance or over

Flexible expansion of your tenant base

The system grows with your tenants' changing requirements.

Lift emergency calls

The Intercom panel in the lift car performs constant self-monitoring and testing routines. As a result, it requires no extra maintenance and meets the EN 81 standard.

Visitor management

Select the person to speak to on the touch screen, then make your call and view details on how to get there.

Integration of IT infrastructures

The first-ever true convergence of Intercom and IT – full Intercom power and ultimate efficiency at low total cost of ownership (TCO).

Portable Intercom station

This location-independent (indoor and outdoor capable) option provides all communication and control functions.

Parking

Installable Intercom modules for ticket vending machines and barrier gates for communication in case of technical problems.

s to buildings with

er a mobile device.

Help Point

Disabled-friendly information and emergency call stations for heavily frequented locations and meeting points. Fully integrated into a pillar-shaped housing.

Control Desk and visualisation solutions

Central operating unit with audio, video and control functions, including visual representation of all procedures and optional active control.

Disabled-friendly access

Intercom stations for barrier-free access based on the 'two-senses principle', including tactile labels and hearing aid detection.

Commend for Building and Communication Solutions

Meeting communication needs of users and visitors

People work in buildings. These buildings must therefore provide protection and safety – not just in everyday life, but especially in emergencies. At the core of the system, the multi-functional control station keeps a watchful eye on every corner of the building and business premises, using a range of additional functions to safeguard workplace security in a discreet and unobtrusive manner.

Secure communication systems by Commend

Can you imagine a system that millions of people rely on every day, where every word has to count? This is the world of Commend! Secure, reliable communication is our passion.

As global market leader with over 40 years' experience in developing voice technology, we have integrated video and interfaces to third-party equipment that complies with international norms and standards. Commend is the natural choice for hands-free voice communication systems all over the world.

Real life still makes for the best stories

How do Commend solutions cope with the tough real-life communication and security challenges at thousands of locations all over the world? Real-life answers to this question are provided by the many case studies of Commend customer projects. They are available as downloadable PDF files in German, English and local languages.

Your local Commend contact person will be happy to answer any further questions regarding individual solutions.

It is the high quality, flexibility, scalability, combined with the many integration options that allows the Commend Building Intercom solution to fit in perfectly with our range of high-quality security solutions.
