by ZENITEL GROUP

IC-EDGE™ Devices

Turbine Series

TCIS-1	TCIS-2	TCIS-3	TCIS-4	TCIS-5	TCIS-6

TCIV-2	TCIV-3	TCIV-5	TCIV-6	TMIS-1	TMIS-2

TFIE-1	TFIE-2	TFIE-6	ECPIR-3P

TFIX-1	TFIX-2	TFIX-3

Desktop Series

ITSV-1	VS-CLIENT

Integration Kits

TKIS-2	TKIE-2	IP-LCM

Speakers

ELSII-10H	ELSIR-10C

Introducing:

IC-EDGE™ Series

The next-generation Intelligent Communication System that delivers out-of-the-box unrivaled sound quality, interoperability, security and ease of use.

Zenitel - the leading provider of **Intelligent Communication** solutions that allow you to **hear, be heard** and **be understood**

BECAUSE
when communication is critical

THE FUTURE OF INTELLIGENT COMMUNICATION

Intelligent Communication is the communication between systems and within business processes. It encompasses all forms of communication, not just voice, to meet the standards and expectations of a truly intelligent system.

Integrated Intelligent Communication Systems will be pervasive, smarter than ever before, and easier to operate and deploy.

PERVASIVE
Wherever we live, work, or travel, we will be surrounded by intelligent communication devices that help us to stay safe, secure, and connected to the people and networks that matter.

SMART
Cloud Intelligence, big data, and machine learning will bring unseen levels of intelligence and interoperability, enabling safe and secure buildings and locations.

EASY
The growing importance of voice and audio as the preferred human interface to devices and networks will allow for reliable and easy voice control and authentication.

INTELLIGENT COMMUNICATION AT THE EDGE

Zenitel introduces a paradigm shift in the way intelligent communication systems are used, deployed and integrated in safety and security systems. We have taken the knowledge gained from cloud computing and moved it to the edge, thereby delivering superior power, flexibility, and expandability.

Success of an intelligent communication system requires Intelligibility, Interoperability and addressing IT stakeholders with the IT Mandate (the illities).

INTELLIGIBILITY
Your ability to hear, be heard and be understood in any situation is essential. Zenitel's Intelligent Communication systems are used in the worlds' most demanding and challenging environments due to their unrivaled sound and audio quality.

INTEROPERABILITY
The next generation of intelligent communication systems offer seamless integration with the leading risk, resilience and security solutions by adopting open standards and out-of-the box connectivity and activation.

IT MANDATE
IT must ensure that intelligent communication solutions are scalable, maintainable, reliable, cyber secure and, most of all, be part of the intelligent network of devices that, together, will create the intelligent business.

IC-EDGE™ Series

The next-generation Intelligent Communication System that delivers unrivaled, out-of-the-box sound quality, interoperability, security and ease of use

EASY
Easily install an IC-EDGE system using a web browser with no external software and no costly server infrastructure. Expand your system easily by simply adding a device.

INTEROPERABLE
Flexible interoperability through open API and industry standard protocols.

SECURE
Cyber defensibility is addressed using Integrated IEEE 802.1X network access control with regular software upgrades to ensure secure, reliable communications.

Next generation **intelligent communication systems** must deliver unseen levels of **operational efficiencies, security** and **ease of use**
