

## VIDEO ENTRY STARTER KIT

**EASY, INTEROPERABLE, SECURE**

The IC-EDGE™ Video Entry Starter Kit addresses the fundamental need for intelligible audio and video all in one easy-to-install system. With an innovative speaker design and noise cancelling technology, the Video Entry Starter Kit is equipped to handle any dynamic noise environment.

- **EASY** - Easily install an IC-EDGE system using a web browser with no external software and no costly (virtual) server infrastructure. System easily expands by simply adding a device!
- **INTEROPERABLE** - Flexible interoperability through open API and industry standard protocols.
- **SECURE** - Cyber defensibility is addressed using Integrated IEEE 802.1X network access control with regular software upgrades to ensure secure, reliable communications.

Is your solution able to effectively communicate with people at a time of need?

What if your solution could provide the power to **hear, be heard, and be understood** every time, everywhere?

***That is the power of IC-EDGE™***

When it comes to understanding a situation, whether it be critical or an everyday task, we depend on our ability to communicate with one another in order to determine the most effective response. Thus, communication must not only be heard, but it must be understood in every situation.

**With Intelligent Communication at the Edge, Zenitel introduces a paradigm shift in the way intelligent communication systems are deployed, used, and integrated in safety and security systems, as well as cloud networks.**

**Key Features:**

- Scalable from 2 to 64 stations.
- The ITSV-1 video desktop station represents the future in VoIP Services, featuring Android™ Operating System 4.2, a 4.3" capacitive touch screen, and the ability to host 6 accounts. You can now use a single device as both your master station and your desktop phone.
- The TCIV can be customized, such as uploading custom audio messages, for a better user experience.
- A rigid design, 10W speaker and amp and digital MEMS microphone make it possible for open duplex, hands-free communication up to 95dB
- Our stations will detect the voice and amplify that signal, while suppressing up to 30dB of background noise.
- The TCIV-2 option offers a stainless steel front plate and die-cast aluminum frame for a robust and elegant design that meets the needs of demanding, outdoor environments with a rating of IP65.
- The TCIV-3 option offers a black thermoplastic front plate and die-cast aluminum frame for a timeless and elegant design that meets the needs of demanding, outdoor environments with a rating of IP65.

**VINGTOR-STENTOFON BY ZENITEL**

Communication is critical in all areas of business, therefore our expertise is focused on providing intelligent communication solutions that allow you to hear, be heard and be understood, every time. Zenitel systems interface with other security systems including CCTV, access control and alarm for a comprehensive security solution. Our primary system offering is within Public Address, Intercom and Radio. Our key markets include: Building Security, Public Safety, Transportation, Industrial Manufacturing, Energy and Maritime. Zenitel systems provide high availability, scalability, reliability, maintainability, and cyber defensibility. By reducing hardware to a minimum, and keeping the benefits of centralized server management, organizations have more flexibility in scale and performance.

**BECAUSE**

when communication is critical
