Solutions

PROTECT PEOPLE AND ASSETS WITH ZENITEL

Zenitel's critical communication solutions for correctional facilities add value to your video-based security system by helping corrections officers to act on what they hear and see. Empower your staff to work efficiently to protect life and facilities with our unified communication solutions.

From Reactive to Proactive Security

Non-pervasive surveillance is essential to security in correctional facilities. Zenitel's intercoms and IP speakers, coupled with smart analytics such as sound detection and scream alarms, provide surveillance and awareness for better protection of staff and people in custody.

Empower Your Staff

Empower your corrections staff by adding interactivity through Talkback and Ambient Listening functions to your Public Address broadcast, enabling prison staff to act in real time and with clear communication, in all types of environments and situations.

Enhance Situational Awareness

By embracing open standards such as SIP and ONVIF, Zenitel simplifies integration by bringing critical communication into your security solution. Our pre-integrated solutions with industry-leading security providers of video management and access control systems enhance situational awareness for operational efficiencies.

Durable Equipment for Peace of Mind

Zenitel delivers a diverse portfolio of compact and robust audio solutions that are ideal for any correctional facility. High ratings of water, dust, and tamper resistance features allow units to be placed in extreme environments, offering a reliable investment and peace of mind.

Today's facilities require a reliable audio system that can be **fully integrated with other security platforms.**

Critical Communication Solutions for complete **Correctional** **Security, Inside and Out.**

Reliable and efficient communication solutions are essential for maintaining security and improving operations at correctional facilities.

Zenitel's intercoms and IP speakers provide clear and dependable communication throughout an entire facility.

Non-Pervasive Surveillance
IP Speakers provide acoustical monitoring of people in custody and enable staff to act in real time and with clear communication.

Real-Time Emergency Communication
Automatic call set-up from cell intercoms using audio threshold detection triggers a response and allows staff to be more situationally aware of events.

Effective Security Response
Rapid and proactive response to incidents in communal areas with superior audio quality from IP communication devices.

Single Point of Control for improved Security and Safety
Unify all your communication needs to a single terminal. Announce live or pre-recorded messages and enable two-way communication.

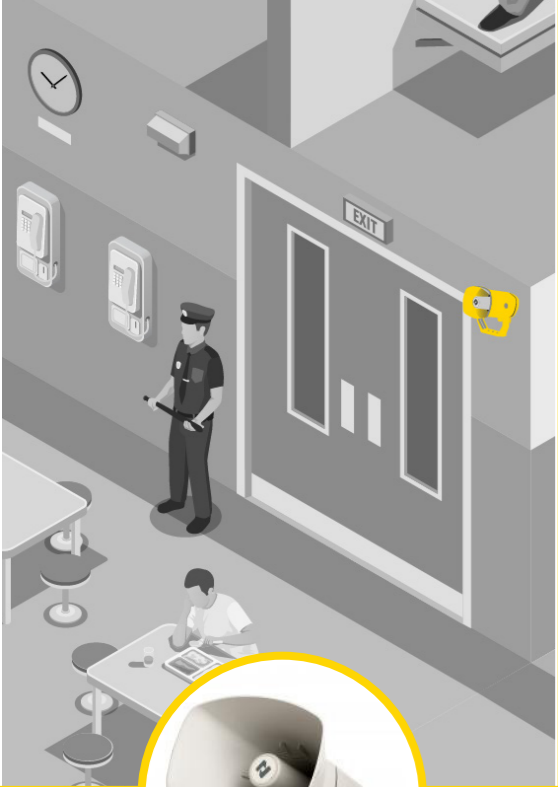

Limit Access and Control Movements
HD video intercoms help with visual and voice identification for the seamless control of movement through doors and gates.

Scalable Architecture
State-of-the-art IP communication for small, medium, and large facilities that can be scaled to individual needs.

Ensuring Security
When It Matters Most

IP Speakers for interactive and immediate response

Empower your staff by adding interactivity through Talkback and Ambient Listening functions.

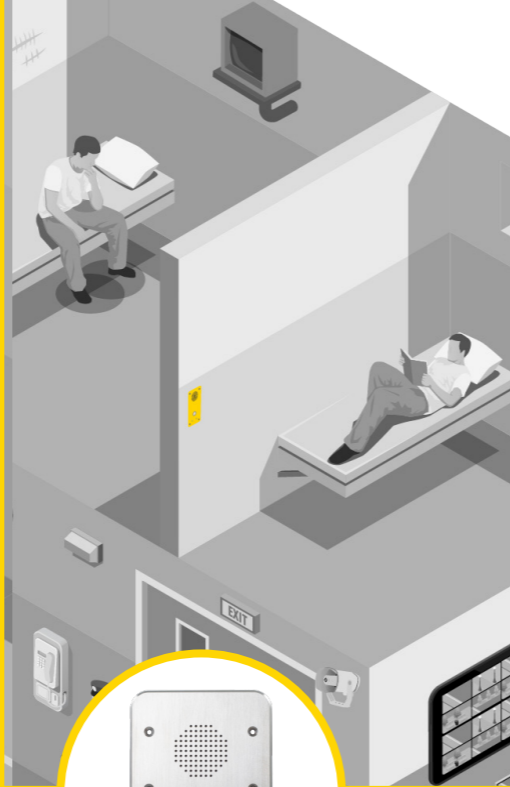

The inclusion of ONVIF support and SIP operation mode enables you to integrate our IP speakers into third-party video management systems, so you can respond quickly and effectively to what you see and hear.

Door entry intercoms for controlling movement

Positive visual and audio user identification with HD video and audio door entry intercoms.

The option to add card readers from leading manufacturers such as HID gives you the freedom and flexibility to design the system you need.

Vandal-Resistant Intercom for tough environments

Our intercoms deliver unparalleled audio quality and are built to last longer, ready to face challenging environments.

In any correctional facility, where conflict and self-harm are common, the anti-ligature design and piezo button with no moving parts makes it highly durable and increases the station's resistance to damage.

Centralized communication for improve safety and security

With out-of-the box integration to other security systems, manage and control all your security assets, including audio, from a single point.

Manage all your communication needs from a single terminal to dispatch live warnings, pre-recorded messages, and enable two-way communication.

Critical Communication Gateway for safety and security

ICX-AlphaCom seamlessly integrates with market-leading prison surveillance, access control, and communication systems.

Deliver advanced intercom functionality such as the ability to prerecord messages on your server for emergency communication and record intercom calls at any connected station.

Critical Communication throughout the facility

Hear and be heard and ensure safety and security needs are met.

Thoughtfully designed, highly durable, and superior quality audio products ensure that your corrections officers can hear and be heard, to help provide a secure facility, inside and out.

Thoughtfully designed, highly durable, superior quality audio products for your security needs.

Peace of mind with **proven and trusted communication solutions**

With more than 125 years of experience, Zenitel is an expert in creating robust and reliable products and solutions.

Zenitel is trusted by prison operators worldwide to ensure the safety and security of staff, people in custody, and facilities. We have deployed thousands of successful communication solutions across prisons and other correctional settings.

We have a proven track record of delivering customer expectations and ensuring the safety, security, and well-being of staff, people in custody, visitors and suppliers.

Cybersecurity to keep systems safe

Cybersecurity compliant

When developing products, Zenitel always meets stringent IT requirements for mission-critical systems. Our correctional facility solutions are highly reliable and maintainable, but also provide defense from cyber threats and attacks.

CIS SecureSuite membership

Through our membership, we further strengthen our cybersecurity defenses by leveraging CIS SecureSuite resources, including CIS Benchmarks, security configuration resources and CIS Controls, to ward off today's most pervasive cyber-attacks.
