Company Information

Practice Company Information

Create your company record by entering **Company Name**, **Web Address** (note http:// is already hardcoded, do not repeat), **Year Incorporated**, and **Description**.

Click **Update Company Information** to save.

A screenshot of a web form for creating a company record. On the left, a vertical grey sidebar contains labels for the form fields: "Company Name", "Web Address", "Year Incorporated", and "Description". These labels are enclosed in a green rectangular box. The form fields are on the right: "Company Name" is a single-line text input; "Web Address" is a single-line text input with "http://" pre-filled; "Year Incorporated" is a single-line text input; and "Description" is a large multi-line text area. Below the form fields is a blue button labeled "Update Company Information", which is also enclosed in a green rectangular box.

Once the initial company record is created, you can select the **Choose File** box to **Upload Logo Image** (jpeg or png file less than 100kB), then click **Update Company Information** to save.

A screenshot of the same web form, but now populated with data. The "Company Name" field contains "Practice Company". The "Web Address" field contains "http://". The "Year Incorporated" field is empty. A new field, "Upload List Image File", has been added below "Year Incorporated"; it contains a "Choose File" button (highlighted with a green box) and the text "No file chosen". The "Description" field now contains the text "Test for Practice Company description.". The "Update Company Information" button at the bottom is also highlighted with a green box.

Once saved, the logo will be displayed to the right as seen below:

Section Description

Add Feature Page Section

Recently Added F

Feature Page Section Name

No records to display.

Select the **Feature Page Section Type** from the drop-down menu:

The screenshot shows the 'Add Feature Page Section' form. The 'Feature Page Section Type' dropdown menu is open, displaying a list of options. The 'Product Areas' option is highlighted with a green box. The form fields include:

- Feature Page Section Type (dropdown menu)
- Feature Page Section Name (text input)
- Web Address (text input)
- Start Date (text input)
- End Date (text input)
- List Order (text input)
- Active? (radio buttons for Yes/No)
- Section Description (text area)

Now input the content for your Feature Page and click **Update Feature Page Section** to save (note: **Feature Page Section Type** and **Feature Page Section Name** are required):

The screenshot shows the 'Add Feature Page Section' form with all fields filled out. The 'Feature Page Section Type' dropdown menu is set to 'Product Areas'. The 'Feature Page Section Name' text input contains 'Product Name or Descriptive Name (e.g. Fence-Mounted Perimeter)'. The 'Web Address' text input contains 'http://'. The 'Start Date' and 'End Date' text inputs are empty. The 'List Order' text input contains '1000'. The 'Active?' radio buttons are set to 'Yes'. The 'Section Description' text area contains 'Enter product information here (will appear on site)'. The 'Add Feature Page Section' button is visible at the bottom.

Editing Tip: You can use **Active?** Yes/No to control when this page content is visible to the public. This allows you to work on editing, and then select “**Active?** Yes” once you are ready to make the page visible.

Once a **Feature Page** is created, it will appear on the **Recently Added Features Page Sections** with an edit icon, or the full list can be accessed by clicking **Feature Pages** and selecting **Feature Page List** from the drop-down menu.

The image shows two parts of the interface. On the left is the 'Add Feature Page Section' form, which includes fields for 'Feature Page Section Type' (a dropdown), 'Feature Page Section Name', 'Web Address' (starting with 'http://'), 'Start Date', 'End Date', 'List Order' (set to 1000), 'Active?' (radio buttons for Yes/No), and a 'Section Description' text area. A blue 'Add Feature Page Section' button is at the bottom. On the right is a table titled 'Recently Added Feature Page Sections'. It has two columns: 'Feature Page Section Name' and 'Edit'. The first row contains 'Test Product Area' and a blue edit icon. The table is highlighted with a green border.

Once you create the record, you can go back to edit by clicking on the edit icon to add additional content:

- List order sets the order of appearance by number. Lowest number appears first, then organized by alphanumeric order if list order number is duplicated. You may use any numerical increments.
- Add an image (jpeg or png file less than 100kB). We recommend an image for each feature page.
- Mark as active when content is ready to be displayed.

Feature Page Section Support

The image shows the 'Update Feature Page Section' form. It includes fields for 'Feature Page Section ID' (3242), 'Feature Page Section Type' (Product Areas), 'Feature Page Section Name' (Test Product Area), 'Web Address', 'Start Date', 'End Date', 'List Order' (1000), 'Active?' (Yes/No), 'Upload List Image' (Choose File), and 'Upload PDF' (Choose File). A green box highlights the 'List Order', 'Active?', 'Upload List Image', and 'Upload PDF' fields. The 'Section Description' text area contains the text 'This is a test.'. A blue 'Update Feature Page Section' button is at the bottom. To the right is a sidebar with a placeholder for a user profile (labeled 'Photo Needed') and four buttons: 'Last Feature Page List', 'Refresh Page', 'Change to HTML Description', and 'Download Edit Manual'.

(Note: You can also add a pdf file to a Feature page section. This is good for supplemental information where no URL exists for what is in the Feature Page section (e.g. a case study). Data sheets are discouraged, as they periodically change and easily become outdated.)

Once saved and active, you can go to the public site, refresh the page to see the content you've added.
Example:

Product Areas

Fence-Mounted Perimeter Protection

There are several useful technologies for fence protection, or Sector 1, which can be fiber optic systems, magnetophonic cable, or MEMS (Micro Electro Mechanical System) accelerometer-based sensors. They are designed to detect different intrusion attempts such as climbing over, cutting or lifting the fence.

Company Information

Adding **Support Resources**

Support Resources will be listed on the side navigation bar of your page under company information. The list order will set the order of appearance:

The screenshot shows a navigation menu at the top with tabs: A & E Specs, Company Information, Personnel, Locations, Web Links, **Support Resources**, Feature Pages, and D. Below the menu, the text 'Support Resources' is displayed in orange. To the right, a dropdown menu for 'Support Resources' is open, showing 'Add Support Resource' and 'List Support Resources'. Below this, the text 'Practice Company' is visible. The main form is titled 'Adding a Support Resource' and contains the following fields:

- Dept or Resource Name:
- Support Resource Active?: ☒ Yes ☐ No
- First Name:
- Last Name:
- Title:
- Phone:
- Email:
- Web Address: http://
- List Order: 1000
- Description:

An 'Add Support Resource' button is located at the bottom right of the form.

Example #1:

The sidebar widget titled 'Support Resources' displays the following information:

- **A&E Support**
John Recesso - A&E Consultant Manager
Phone: +1 603 479-8855
Email: john.recesso@hanwha.com

Example #2:

The sidebar widget titled 'Support Resources' displays the following information:

- **Design Support**
Chris Grabowski - Director of Sales Support
Phone: 910-814-3800
Email: chris.grabowski@boonedam.com
- **Technical Services**
Sam Nussman - Director of Technical Services
Phone: 910-814-3800

Company Overview

Honeywell's Security and Access Solutions brands provide high-value security products and services that are critical for buildings around the globe. Building operators and security teams across dynamically evolving verticals depend on our mobile- and cloud-enabled technologies for access control, intrusion detection, and video surveillance solutions to help create safer and more efficient facilities.

[buildings.honeywell.com/us/en/brands/our-brands/security](#)

Product Areas

Integrated Access Solutions

Honeywell is a global industry leader, providing a diverse range of access control solutions tailored to meet the needs of clients worldwide. Our offerings are characterized by their flexibility, scalability, and seamless integration, incorporating the latest technologies and innovations. Among our leading solutions are OnGuard, Pro-Watch, NetBox, Elements, and Win-Pak each designed to enhance security and streamline access management for organizations of all sizes.

[Find Out More >>](#)

NDAA Compliant Video Solutions

Honeywell IP cameras deliver exceptional image quality while optimizing bandwidth usage and minimizing storage requirements. Our extensive selection of cameras includes indoor and outdoor options such as dome, box, bullet, PTZ, multi-imager, fisheyes, pin hole, dual technology and bi-spectrum models. Incorporating cutting-edge technologies such as intelligent video analytics, enhanced low-light performance, and advanced compression algorithms, our solutions are designed to meet the evolving demands of modern surveillance.

[Find Out More >>](#)

Honeywell Vindicator Technologies

Honeywell Vindicator stands out in the Security Solutions sector as a provider of specialized engineered solutions that leverage our own world-class technology and products. We empower end-users and integrators to effectively address the challenges of their most demanding applications.

Our solutions are anchored by the Vindicator network, an IT-based platform designed for the seamless integration of security systems and building automation. It is recognized as one of the world's fastest and most secure data communications networks, ensuring optimal performance and reliability in critical environments.

A & E Specification

If your company's website has a landing page dedicated to A & E Specs, you can add a link to make it easier to navigate directly to that information by going to **A & E Specs, Add A & E Specification**, and selecting **A & E Specification – Portal** or **A & E Specification – Product**.

A&E Specification - Portal is a link that is public facing and is designed to take people to a landing page on a manufacturer's site. That page may or may not have its own login. Companies that use this link are shown on the Manufacturers tab on SecuritySpecifiers.com under Sponsor A&E Resources.

A&E Specification - Product (multiple are allowed) link designed to take people to a landing page on a manufacturer's site to specific products' or group of products' A&E documentation. Only a consultant who is logged in may get access to these links.

Option #1: Add using the **A & E Spec** tab, select the desired **Link Type** and enter the **A & E Spec Link Name** as your company name, and the **Link URI** will be the page on your company's website with relevant data.

The image shows a navigation bar with 'A & E Specs' and 'Company Information' tabs. Below 'A & E Specs' are three options: 'Add A & E Specification' (highlighted with a green box), 'List A & E Specification', and 'Add A & E Specification'.

The main form is titled 'Adding an A & E Specification Link'. It contains the following fields:

- Link Type:** A dropdown menu with 'Select Link Type' as the current selection.
- A & E Spec Link Name:** A text input field with 'Select Link Type' as the placeholder. Below it, a dropdown menu shows 'A & E Specification - Portal' (highlighted) and 'A & E Specification - Product'.
- Link URI:** A text input field with 'A & E Specification - Product' as the placeholder.
- Link Active?:** Radio buttons for 'Yes' (selected) and 'No'.
- List Order:** A text input field with '1000' as the value.
- Description:** A large text area.

At the bottom of the form is a button labeled 'Add A & E Specification Link'.

Option #2: Add **A&E Specifications** using the **Web Links** tab:

The image shows a navigation bar with several tabs: 'A & E Specs', 'Company Information', 'Personnel', 'Locations', 'Web Links' (highlighted with a green box), 'Support Resources', and 'Features'. Below 'Web Links' are two options: 'Add Web Link' (highlighted with a green box) and 'List Web Links'.

The main form is titled 'Adding a Link'. It contains the following fields:

- Link Type:** A dropdown menu with 'Select Link Type' as the current selection.
- Link Name:** A text input field with 'Select Link Type' as the placeholder. Below it, a dropdown menu shows 'A & E Specification - Portal' (highlighted) and 'A & E Specification - Product'.
- Link URI:** A text input field with 'A & E Specification - Product' as the placeholder.
- Link Active?:** Radio buttons for 'Linked In - Company' (selected) and 'RSS - Company'.
- List Order:** A text input field with 'Vimeo - Company' as the value.
- Description:** A large text area with 'Webinar Calendars' and 'X (Twitter) - Company' as the placeholder text.

At the bottom of the form is a button labeled 'Add Link'.

Security Industry Association Endorses SecuritySpecifiers®

The Security Industry Association (SIA) and SecuritySpecifiers have announced their working relationship to co-promote their organizations' goals and activities. Don Erickson, CEO of SIA, said 'SIA endorses the efforts of SecuritySpecifiers in promoting awareness and understanding of products and technologies of the security industry manufacturer community and in enhancing the visibility of security consultants and designers within the industry.' SIA is represented on the SecuritySpecifiers Advisory Board, which provides strategic direction and guidance to the organization. SIA is the leading trade group for businesses in the electronic and physical security market. SIA protects and advances its members' interests by advocating pro-industry policies and legislation on Capitol Hill and throughout the 50 states; producing cutting-edge global market research; creating open industry standards that enable integration; advancing industry professionalism through education and training; opening global market opportunities; and providing sole sponsorship of the ISC Expos, the world's largest security trade shows and conferences.

[SIA Web Site](#)

Featured Manufacturers

Accessible through the menu in the left column, our customized sponsor pages form a 'mini web-site' that arranges content in a standard format and links back to the manufacturer's main site. Why is this significant? Mainly, the content displayed is that which manufacturers deem to be of primary importance to system designers. By arranging this content in a standard, yet customizable format, information may be found more quickly and easily across multiple manufacturer sites.

Diamond Sponsors
